

CHEMISTRY 230
LABORATORY SCHEDULE
WINTER 2015

Chemistry 230 Labs are held in LB-321. Labs begin the week of Jan 15th 2015.

You are expected to come to the lab on your assigned day: Check your lab section (day and time) on your registration form. There will be a pre-lab conference at the beginning of each section. It is important that you arrive on time. Afternoon sessions are at 2.30 pm.

You should purchase a **Chemistry 230 lab manual** from the book store before the lab. Bring the manual and a note book to the first lab session.

Safety in the lab is of critical importance. Eyeglasses and lab coats must be worn at all times. Those of you who do not have prescription glasses must wear safety glasses, which can be purchased from the science stores. **You MUST have a lab coat and glasses for the first lab session.**

If you have any questions about the lab, or need some extra help with the material, don't hesitate to contact Rakesh Rajagopalan (rakeshscs@gmail.com) or check out the web page at <http://uregina.ca/~tymchakm/>

Date	Experiment
Jan 6 th	First day of classes
Jan 15 th -16 th	Experiment 1
Jan 22 th – 23 th	Experiment 2
Jan 29 th – 30 th	Experiment 2 end, Experiment 3a
Feb 5 rd – 6 th	Experiment 3b
Feb 12 th – 13 th	Molecular modeling packing of Crystals Quiz
Feb 19 th – 20 th	Spring break
Feb 26 th – 27 th	Experiment 4
Mar 5 th – 6 th	Experiment 4
Mar 12 th – 13 th	Experiment 5
Mar 19 th – 20 th	Experiment 5
Mar 26 th – 27 th	Experiment 6
April 2 nd -3 rd	Experiment 6
